PROFESSIONAL COMPUTER TRAINING

PREFACE

The working on the project “**www.Shoppingkart.com**” was an extremely learning experience. I came across no. of new concepts and also enhanced our technical knowledge. I was capable to overcome the position. I have used the ASP.NET in such a manner that this website is friendly with all the browsers like Internet explorer, Chrome, Firefox. Exact now this website is in the testing stage.

I have created a project of **www.Shoppingkart.com** in ASP.Net language. Now a days craze of online shopping in India is increasing rapidly because in present time online shopping is very easy and comfortable. With the use of online shopping we save money and time both so the growth of online shopping user in India day by day increase and many online store currently active which provide best deal and offers online which causes growth of online user increase. In India there are many online site which causes online user increase in India.

Practical training is a way to implement theoretical knowledge to practical use to become a successful engineer, it is necessary to have a sound practical knowledge because it is only way by which one can learn and acquire proficiency.

It is approved fact that bookish knowledge is not sufficient because the things are not as ideal in practical field as they should be.

Project is a special signification for the engineering student, it is special rule too.

We learn to tackle different real world problem that strike while developing any real world computer applications.

The report is an attempt made to study the summer training in Asp.Net and MS SQL SERVER at Javonic Websoft Pvt. Ltd. Sec-4, Hiran Magri, Udaipur (Raj.)

ACKNOWLEDGEMENT

“Task successful makes everyone happy. But the happiness will be gold without glitter if we didn’t state the person who has supported us to make it a success”.

Success will be crowned to people who made it a reality but the people whose constant guidance and encouragement made it possible will be crowned first on the eve of success. This acknowledgement transcends the reality of formality when we would like to express deep gratitude and respect to all those people behind the screen who guided, inspired and helped us for the completion of our project work.

We want to thank **Dr. Deepak Gupta (Head of Dept.)**, **Mr. Jai Sharma (Project Co Incharge)** and **Mr. Hemchandra Vaishnav** for their full support, cooperation, valuable advice throughout the course of project, which led our project to successful completion.

We want to thanks our parents who have given us this opportunity and family members for their get support and love.

We would express our profound gratitude towards **Mr. Gourav Bhatt (Senior Developer, Javonic WebSoft Pvt. Ltd)** who guided us throughout the project. He supervised our project constantly and inspired us to create user-friendly and robust software. He brought to our notice the problems in our project and inspired us to come up with innovative solutions to overcome the same.

Last but not least we would like to thanks all those who have directly or indirectly helped during our project period.
